

*A Summer Message from
Rev. Dr. Bob Kimmerly*

Massive storm clouds have unleashed their light shows thundering through our summer heat. Gentle rains and long evenings scented by God's roses follow the afternoon's swelter. This time of year we go through many contrasts. We have the bustle of holiday activity spinning wheels beside eternal construction delays, promising our future built better and brighter.

We at Kirk United Church look for the future we've been building for a couple of generations. Some of the choices facing us may feel like the towering clouds while we long for the gardens we planted in former times. God just seems to be like that. In the church we measure time in centuries, which are even longer than construction on the Anthony Henday. Our traditions and beliefs have bubbled through millennia to enrich and grow our faith. God is as fresh as the lightening that flashes across the Prairie sky and as ancient as the rocks.

Some of our church family travel and we miss them for weeks. Others are the ones visited. Why not bring your summer guests to share our Sunday Morning celebration of faith. Remember that we offer a first class service in every seat.
